Childhood Asthma Control Test for children 4 to 11 years.

This test will provide a score that may help the doctor determine if your child's asthma treatment plan is working or if it might be time for a change.

How to take the Childhood Asthma Control Test

Step 1 Let your child respond to **the first four questions (1 to 4)**. If your child needs help reading or understanding the question, you may help, but let your child select the response. Complete the remaining **three questions (5 to 7)** on your own and without letting your child's response influence your answers. There are no right or wrong answers.

Step 2 Write the number of each answer in the score box provided.

Step 3 Add up each score box for the total.

Step 4 Take the test to the doctor to talk about your child's total score.

19 or less If your child's score is 19 or less, it may be a sign that your child's asthma is not controlled as well as it could be. Bring this test to the doctor to talk about the results.

Have your child complete these questions.

1. How is your asthma today?

0	1	2	3	SCORE
Very bad	Bad	Good	Very good	

2. How much of a problem is your asthma when you run, exercise or play sports?

0	1	2	3	
It's a big problem, I can't do what I want to do.	It's a problem and I don't like it.	It's a little problem but it's okay.	It's not a problem.	

3. Do you cough because of your asthma?

0	1	2	3	
Yes, all of the time.	Yes, most of the time.	Yes, some of the time.	No, none of the time.	

4. Do you wake up during the night because of your asthma?

0	1	2	3	
Yes, all of the time.	Yes, most of the time.	Yes, some of the time.	No, none of the time.	

Please complete the following questions on your own.

5. During the last 4 weeks, how many days did your child have any daytime asthma symptoms?

5	4	3	2	1	0	
Not at all	1-3 days	4-10 days	11-18 days	19-24 days	Everyday	

6. During the last 4 weeks, how many days did your child wheeze during the day because of asthma?

2. During the past WEEK, how often did you sneeze?

5 ☐	4 ☐	3 ☐	2 ☐	1 ☐	

5. During the past WEEK, how often did you AVOID any activity (for example, gardening, exercising, visiting a house with a dog or cat) because of your nasal or other allergy symptoms?

Never	Rarely	Sometimes	Often	Extremely Often

The higher the score, the better controlled you are with your nose and eye symptoms.

A score that is **lower** than **21** suggest that you are not well-controlled.

WEEKLY URTICARIA ACTIVITY SCORE (UAS7)

Please complete the diary for 7 days. This will provide your UAS7 score for the week before your next appointment.

When completing the diary, please try to reflect the previous 24 hours as a whole, not merely the current situation.

Step 1: Instructions

Evaluate the **last 24 hours** in terms of both the wheals (hives) and the itching with a score, using the scale described in the table below:

Wheals (hives) Score	Itching Score
0 = No wheals	0 = None
1 = Mild (<20 wheals)	1 = Mild (present but not annoying or troublesome)
2 = Moderate (20-50 wheals)	2 = Moderate (troublesome but does not interfere with normal daily activity or sleep)
3 = Intense (>50 wheals)	3 = Intense (severe itch, which is sufficiently troublesome to interfere with normal daily activity or sleep)

For instance, if you had 30 wheals in the past 24 hours, you would score a **2** for wheals. If your itching in the past 24 hours was intense and interfering with sleep, you would score a **3** for itch, making your total score for the day: 2 + 3 = **5**.

	Wheals Score/24h				Itching Score/24h				Total
e.g.	0	1	②	3	0	1	2	③	5

Step 2: Your weekly UAS (UAS7)

Please enter your scores for the corresponding day in the table below by circling the appropriate number. Add the two scores together and write the total for that day in the right hand column.

Finally, at the end of the week, add the seven daily scores and enter your UAS7 score in the grey box.

		Wheals Score/24h				Itching Score/24h				
Day	Date	None	Mild	Moderate	Intense	None	Mild	Moderate	Intense	Total
1		0	1	2	3	0	1	2	3	
2		0	1	2	3	0	1	2	3
